

PROMASTOP®-CA

Fire stopping coating

General description

PROMASTOP®-CA is a water-based, single component fire stopping coating, which provides protection against spread of fire.

Field of application

PROMASTOP®-CA in combination with additional protection is a fire stopping coating for services in walls and floors. It is designed for use with single cables, cable bundles and combustible and non-combustible pipes to prevent the spread of smoke, fire and heat.

System advantage / customer benefit

- Suitable for use in damp rooms (i.e. high humidity levels, splashing water, etc.)
- Excellent adhesive properties
- For usage as paint and filler

Test certificate / approval

- EN 1366-3
- EN 13501-1/2
- EAD-350454-00-1104

Packaging

- 12 kg/pail
 - 56 pails/pallet
 - 672 kg/pallet
- Subject to change

Storage requirements

- Store in cool and dry conditions: 3°C–35°C
- Shelf life of original sealed containers at least 12 months
- Once opened, containers should be finished swiftly

Safety instructions

- Please refer to the safety data sheet for additional advice

Technical data and properties

	PROMASTOP®-CA
Colour	white
Consistency	liquid
Density	1.5 ± 0.2 g/cm ³
Use category	Class X
Reaction to fire	Class D-s2,d0

The products must be applied in accordance with regulations for construction material in general and fire stopping in particular, with the applicable national test certificates and approvals and in accordance with applicable national building regulations. Products may only be applied by trained professionals with adequate knowledge and only after thorough review of the installation guidelines, safety data sheets, national test certificates and approvals. For additional information on how and where to use this product please refer to the Promat handbook or contact your local Promat office. All the relevant documents can be obtained free of charge from the local Promat office. For Non-European Union countries separate guidelines are relevant. If required please contact us.
